Summary

Full-Stack Web Developer leveraging a background in retail and warehouse management with a passion for building dynamic web applications. A graduate of Case Western University with a certificate in Web Development. Able to think creatively and analytically, with an affinity for patterns. A proven leader and team collaborator recognized for building creative user interfaces.

Technical Skills

HTML5, CSS3, Sass, JavaScript, JQuery, JSON, Rest API's, React, Node.js, Express, SQL, MongoDB

Projects

Github Profile Finder | github.com/Joelynn94/github_profile_finder | <https://githubfinder897654.netlify.app/>

- A web application built with React, using the context API for state management that lets you search for Github users. If the user that was searched exists, view a profile to see a few facts (website, username, bio, hireable).
- The front-end was built using React (hooks, functional components) and the context API for state management.

Developer Profile Generator | github.com/Joelynn94/dev-profile-generator | joelynn94.github.io/dev-profile-generator

- A command-line application that dynamically generates a PDF file (a GitHub profile) from a GitHub username - the user will be prompted for the developer's username and then choose a color to use as the background color.
- Built with HTML, CSS, JavaScript, Node.js, Github API.

Professional Experience

Buyers Products Company; Mentor, OH

02/2020 – Present
